

Unleashing Your Creativity with Precision+: A Step-by-Step Guide

1

Choose Your Area

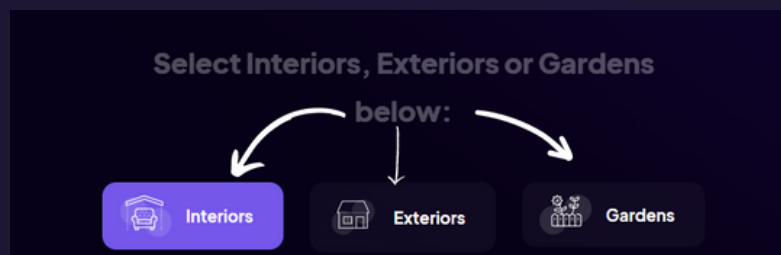

Welcome to HomeDesigns AI, where you can turn your design visions into reality! Let's embark on a creative journey as we walk you through the step-by-step process of using our Precision+ Module:

First things first, decide which area of your house you want to revamp. You have three options to choose from:

- Interiors
- Exteriors
- Gardens

Simply click on the corresponding buttons to make your selection.

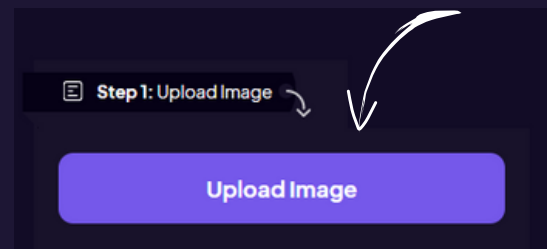

2

Upload Your Picture

To get started, let's breathe life into your ideas! Click on the "Upload Image" box to add the picture you wish to work with. You have the freedom to choose a photo from your smartphone or computer gallery. Remember to ensure that your picture is in either .png or .jpg format for smooth processing

For the best results, we recommend using photos taken in natural lighting. Also, try to avoid using the "wide" setting on your camera.

3

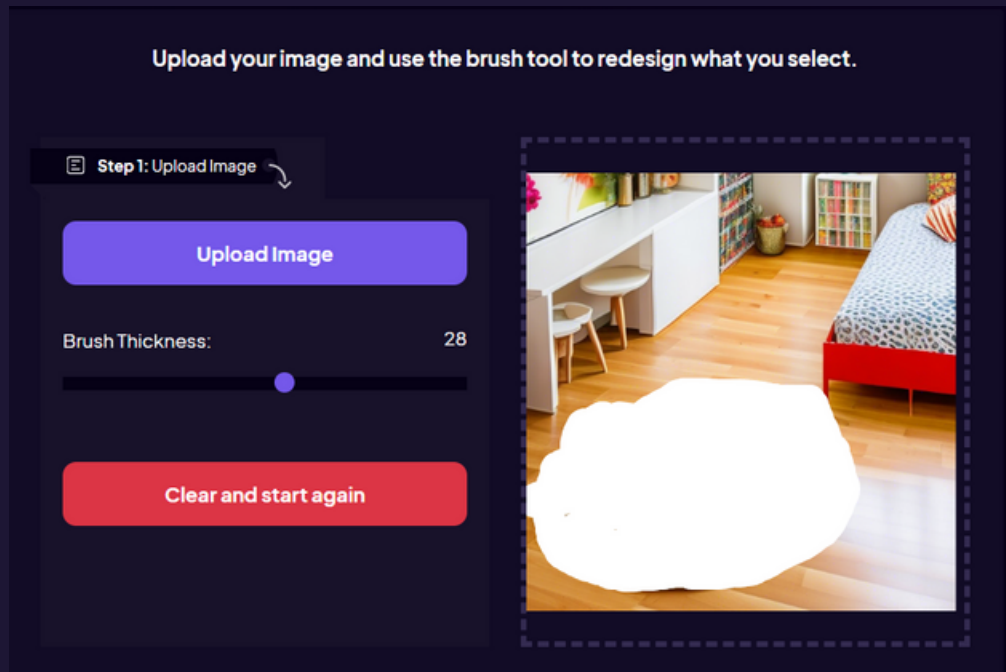

Crop the Image

Once your picture is uploaded, you can further refine it to perfection. Use our easy-to-use cropping tool to focus on the specific elements you want to highlight in your redesign.

4

Highlight with the Brush Tool

Let your creativity shine! Our Brush Tool allows you to effortlessly highlight the elements in the image that you want to change. Whether it's giving your walls a new color or experimenting with different furniture styles, the Brush Tool is your artistic ally.

5

Add Custom AI Instructions

Now it's time to add a personal touch to your design. With our "Custom AI Instruction" box, you can include specific elements to bring your unique vision to life. Want to see a "purple rug" in your room? Simply check the box and type in your instructions, and our AI will work its magic.

A screenshot of the 'Custom AI Instructions' form. A white arrow points to the 'Add your AI prompt' text box, which contains the text 'Purple rug'. Below this are three dropdown menus: 'Select Design Style' (set to 'Eclectic'), 'Select Room Type' (set to 'Living room'), and 'Number of designs' (set to '1'). At the bottom is a green 'Generate New Design' button.

Add your AI prompt below. Use this box to communicate with our AI and list the changes that you want it to make in the selected area. Different prompting structures will yield different results. Feel free to experiment!
